Marysville, WA 98270

- Tulalip Health Clinic
7520 Totem Beach Road
Tulalip, WA 98271
Open to general public and Native Americans

“Snohomish County, during the past week, has received 16,700 doses of vaccine to offer to pregnant women and very young children in our community, who are the most vulnerable to complications from H1N1 illness,” said Dr. Gary Goldbaum, Health Officer and Director of Snohomish Health District. “As additional doses arrive in the county, the Health District will expand the eligibility requirements.”

Only FluMist nasal spray will be offered to healthy children ages 2 through 4 years. Injectable vaccine will be reserved expressly for pregnant women, infants ages 6 months to 2 years, and children ages 6 months through 4 years who have asthma, cerebral palsy, congenital heart conditions or other chronic medical conditions. Children will require two doses of vaccine for full immunity and should generally get the second dose through their own health care providers within four weeks.

Additional clinics remain planned for Oct. 31, Nov. 2, 7, 14, and early December, however, these are subject to change due to vaccine supply.

Check www.snocoflu.com for the most current information, or call the Snohomish County Flu Hotline at 425-388-5088 (staffed Mon-Fri 10a.m.-4 p.m., recording after hours).
