

## Summer Class from Snohomish Conservation District

### Arlington – Bryant area

### Grass-fed Beef Production, Controlling Weeds, and Growing Healthy Grass

**Date - Saturday, July 24**

**9:00 AM – Noon**

**Where**

Lowell Heights Community Club  
4305 269th PL NE  
Arlington, WA 98223

If you would like to begin raising beef as a source of meat for your family, or to sell as an income source, you will want to hear Bobbi Lindemulder of West Valley Beef as she covers topics crucial to successful grass production, tasty beef and happy customers.

Whether you have horses, sheep, goats or cattle, our farm planners will update you on what you should be doing now to keep your pastures healthy going into Fall. And who isn't dealing with weeds? Sonny Gohrman, the County Noxious Weed Coordinator, will cover what to be on the watch for - both in your pasture and around your property.

*This workshop is funded by a Department of Ecology Centennial Clean Water Fund grant to help landowners reduce impacts to their land and improve water quality.*

### **Classes are free but require pre-registration**

**Email:** [workshops@snohomishcd.org](mailto:workshops@snohomishcd.org) **or Phone:** 425-335-5634, ext 123 and leave your name, phone number, email, and the number that will be attending. Please tell us which class you would like to attend too!

**Maps:**

Workshop map will be posted on the website the week before the event.
