In November 2008 Snohomish County Public Works held a public open house at Fernwood Elementary School to present a proposal to extend 198th Pl SE between York Road and Jewell Road. The new alignment was proposed as a way to address traffic issues at the York Road-Jewell Road intersection.

During the open house residents provided comments and ideas for the Jewell/York Road intersection. A final design has not been chosen, however the comments will be included in the design process. The project is currently on hold until a source of funding can be identified. You may register on the project page for e-mail updates as information changes. [www.snoco.org](http://www.snoco.org), search "198th"

For information about Snohomish County road projects type "road projects" in the search box from the County's home page.
