

The new 57th Ave. SE sidewalk from the elementary school north to 228th St. SE was completed in September.

Update on Projects near 228th Street SE / 45th Avenue SE

Snohomish County Public Works is working on several projects to improve conditions for residents who walk and bicycle in the area of 228th St. SE west of SR 9. These projects are funded by King County and managed by Snohomish County as part of an agreement related to construction of the Brightwater Wastewater Treatment Plant. The agreement provides a total of \$70 million for neighborhood improvements that include sidewalks, bike lanes, park facilities, as well as wildlife habitat conservation and a community resource center.

Progress During 2010

57th Ave. SE (Kokanee Elem. School–228th St. SE)

The first pedestrian project is completed. Construction of the new sidewalk along the west side of 57th Avenue SE began in August and was finished in September. The sidewalk stretches from Kokanee Elementary School north to 228th Street SE. Parking was also added along 350 feet of the road near the school at the south end.

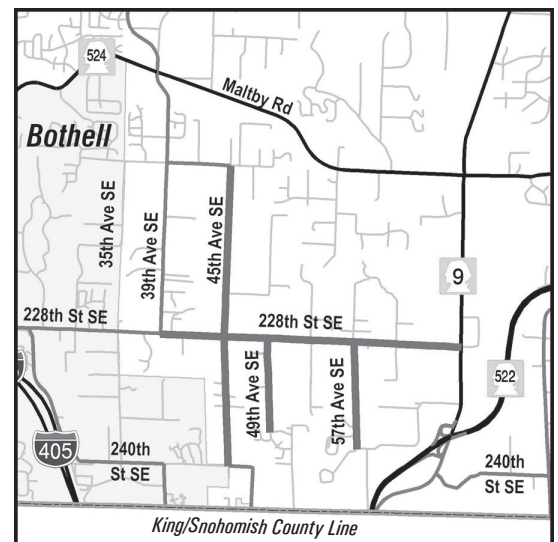

Construction Scheduled for 2011

Work will begin this year on the following three projects:

49th Ave. SE (228th St. SE–236th St. SE)

A five-foot wide porous sidewalk adjacent to the roadway is planned for the west side of 49th Ave. SE between 228th St. SE and 236th St. SE. Porous sidewalks allow stormwater to filter through the ground underneath rather than adding to water runoff. The sidewalk will be added within the public right-of-way which will be marked with stakes in early 2011.

Comcast, Frontier, PUD and Puget Sound Energy have been moving their facilities in preparation for the new sidewalk. Public Works has also coordinated with Alderwood Water and Wastewater District (AWWD) which had planned to replace the existing water main. Snohomish County will manage the water main

project for AWWD. Coordinating the timing of the water main and sidewalk projects will save money and reduce inconvenience to residents.

Once the water line is installed on the east side of 49th Ave. SE, work will begin on the sidewalk on the west side of the road. Both projects are expected to be completed during the 2011 summer construction season.

45th Ave SE Sidewalk (240th St. SE–212th St. SE)

Along 45th Ave. SE, a five-foot wide porous concrete sidewalk will be added to the east side of the street between 240th St. SE and 228th St. SE. AWWD’s water main will be replaced on the west side of this same section of road.

North of 228th St. SE, the water main project switches to the east side of the road and continues to 224th St. SE. On the west side of 45th Ave. SE, gaps in the sidewalk will be filled in between 228th St. SE and 212th St. SE. A walkway will be added along a section north of 216th Pl. SE where insufficient public right-of-way exists for a sidewalk.

228th St. SE (39th Ave. SE–SR 9)

Sidewalks will be added to both sides of 228th St. SE, along with curbs, gutters and bike lanes between SR 9 and 39th Ave. SE. There will also be a continuous center turn lane and the completion of an eastbound climbing lane.

The draft plan included a westbound “climbing lane” on the north side of 228th St. SE. The westbound lane would have been paid for by Snohomish County’s road fund and has since been eliminated from the plans due to a funding shortfall.

Construction is planned to begin in 2011 and continue into 2012.

Construction Scheduled for 2012

Miner’s Corner Community Park

The Snohomish County Parks Department is finalizing plans for Miner’s Corner Community Park, which will be located at the intersection of 228th St. SE and 45th Ave. SE. The property totals 12 acres. The Parks Department developed a Draft Development Plan for the site based on public input received through meetings, emails, one-on-one conversations, and the Citizen Advisory Group. A color drawing of the draft plan is posted on the Snohomish County Web site: www.snoco.org, search “Miner’s Corner.”
