

Little Bear Creek / 51st Avenue SE 1st Culvert Replacement Complete

Construction of the northern most culvert on 51st Avenue SE is complete and the road is open again to through traffic. Completion of the first culvert took longer than anticipated due to unforeseen challenges during construction.

A decision was made to postpone construction on the second culvert until summer 2012 to avoid prolonging the full closure this year and rerouting school buses.

We understand that this has been an inconvenience for all who live and commute on this road. We thank you for your patience and understanding. To stay updated on the project, visit the project Web page and become a subscriber (www.snoco.org, search "51st Ave Culvert"). If you subscribe, you will receive an e-mail when the new schedule is posted next year. Postcards will also be mailed.

If you have any questions, please feel free to contact Nova Heaton, Snohomish County Public Works Surface Water Management, 425-388-3261 (TTY: 711).

For more information on other road project, visit www.snoco.org (search "road projects").
