Work on Mountain Loop Highway Bridge #102 will cause traffic delays of up to 15 minutes

Snohomish County Bridge #102 spans the South Fork of the Stillaguamish River one-half mile northeast of Granite Falls along the Mountain Loop Highway. A contractor working for Snohomish County will be repairing and paving the structure on Saturday, September 19, 7 a.m. to 7 p.m. unless rain delays the work until Sunday, September 20. The work will require a single lane closure and alternating traffic which could create traffic delays of up to 15 minutes.

An electronic sign has been placed at the east end of Stanley Street in Granite Falls to notify drivers of the traffic delays before they turn onto North Alder Avenue and the Mountain Loop Highway.

Emergency vehicles will have access at all times.

For information on other road construction projects in Snohomish County visit the County's website, www.snoco.org, and type "Roads Central" in the search box; or call the roads central information line, 425-388-3959, where you can also leave a message. Comments and questions may also be e-mailed to transportation@snoco.org.
