

# One lane of May Creek Road is closed

A single lane closure is in effect on May Creek Road at Bridge #559 approximately 9 miles east of Gold Bar. An inspection by Snohomish County Public Works revealed scour damage around the piers. The two-lane, 31 foot long structure was built in 1975 and has been added to the bridge replacement list. The County is seeking funding to replace the bridge with a longer span. The single lane closure is in effect until further notice.

To register for e-mail updates on this project visit Snohomish County's web page, [www.snoco.org](http://www.snoco.org), and type **Bridge 559** in the search box. For information on other major road projects, type **road projects** in the search box.
