Pick-up service for
businesses only

Important

- All needles must be in approved containers before they are dropped off.
- Before purchasing a container, check with your disposal vendor to find out which containers they accept.
- Please call all service providers ahead of time for specific disposal instructions and prices.

Note: The County does not recommend any particular business, nor is this list inclusive of all businesses that provide these services.

Don't Needle Your Garbage Collector

Due to Washington State Law, sharps must be kept out of the waste stream and are not accepted for disposal at Snohomish County solid waste facilities.

Used syringes, needles and lancets (collectively called "sharps") do not belong in the garbage or recycling. They can injure garbage collectors and other workers. They should not be flushed down the toilet.

Used needles require special handling and disposal in order to protect public health and the environment.

A special "Sharps Collector" is available from some local pharmacies and other service providers (check online sources as well). The containers are puncture-proof plastic with a lid. They hold a large number of syringes, and can be returned to a participating pharmacy for safe disposal. The containers are also a safe way to store used sharps for pick-up or mail-back services available from several private waste companies. Check with your insurance provider to see if this expense is covered.

Inside is a list of service providers and the types of services available. Individual providers may have limitations and exceptions. Please call them for prices and for specific disposal instructions.

Thank you for helping protect workers and the environment.
